10. The chair informed the group that ICID has taken the initiative to document the development of irrigation and drainage schemes in the world by establishing an online Register on “World Irrigation and Drainage Schemes (WI&DS)”. WI&DS will fulfill the need for a much-awaited global repository of information in systematic irrigation and agricultural water management. More details regarding the process required and other details, in case of any doubt, are outlined on the portal <https://wip.icidevents.org/> in detail.

WG-WATS Minutes Item 11: Any other business

11. Restructuring of the Working Group: The Chair informed the group that during the 73rd International Executive Council (IEC) meeting in Adelaide, it was decided by the IEC to look into the possibility of integrating WGs of similar/close mandates. With consultation of PCTA, PCSO, the Secretary General of ICID, and the ICID Central office, a tentative new structure was developed. Among the existing 18 groups, nine of them will complete their mandate in November 2023. The remaining working groups proposed to be structured into 11 new working groups under four themes: (1) Irrigation and Drainage; (2) Natural Resources; (3) Climate Change and impacts; and (4) Sustainable Development. The chair informed the members that the proposed restructuring and new structure of the WGs will be deliberated during PCTA and IEC meetings of the 74th IEC meetings. Under these four themes, the WG-WATS has been included in theme 1 (Irrigation and Drainage) and integrated with WG-SON-FARM. A report on the restructuring of the working groups is given in IEC Annex 4, page 44.
